

## PA492U | DEFCON Video Port Combination Lock

The DEFCON VPCL is the only system that combines a galvanised steel cable with a high quality 4 digit re-settable combination lock designed to fit the video port on your desktop and/or notebook computer, TFT monitor, projector and more. With almost 10,000 user-settable combinations, this keyless security cable lock gives you the hassle-free of carrying or losing a key. Simply secure your computer to an immovable object and your Defcon VPCL will deter thieves from trying to steal your computer. The DEFCON VPCL utilises a specially designed pass through video cable that allows users to still use their monitor or projector while the DEFCON VPCL is secured to the video port. This combination lock's unique serial lock design makes this truly one of the toughest and strongest locks out in the market place. Includes a screw lock for PC your PC case.
