

## Introduction

Congratulations on your purchase of a SoundUP for iPod from Targus. This sound enhancer uses Phantom Technologies™ patented circuit that provides 20 - 25% more music envelope revealing instruments, voices and spatial characteristics that are often masked in compressed files. The result is a rich, immersive, 3-dimensional listening experience that recreates studio quality sound. SoundUP provides a remote connector pass through to allow use of the iPod wired remote or the Targus RemoteTunes™ Wireless Remote with SoundUP.

## Features

- Separates and reprocesses digital music files to provide rich three dimensional sound
- On/Bypass switch allows you to hear what you've been missing
- Two headphone jacks allow you to share your music without splitting the signal or volume
- Does not require batteries; draws minimal power from the iPod and has auto shut off feature
- SoundUP restores the richness and spatial characteristics of original recordings
- Remote pass-through connection allows the use of the iPod wired or other remotes

## Operation

- 1 For the best results, your headphones should have an impedance of about 16 ohms.
- 2 With the iPod turned off, plug SoundUP into the headphone and remote jack located on the top of the iPod.
- 3 Plug one or two headphones into either headphone jack on the SoundUP. Adjust the volume on the iPod to the lowest level.
- 4 Turn on the iPod, push the iPod play button and adjust the iPod's volume to the desired level.
- 5 Slide the bypass switch to the "On" position to enable the SoundUP audio enhancement feature.
- 6 Adjust the iPod's volume to maintain a comfortable listening level.
- 7 When you finish using your SoundUP, simply unplug it from the iPod.

## Care

- Keep SoundUP away from dust, dirt and moisture.
- To clean, wipe gently with a moist cloth.
- Avoid extreme temperature environments.
- Handle with care.

## Product Registration

Targus recommends that you register your Targus accessory shortly after purchasing it. Go to: <http://www.targus.com/registration.asp>

You will need to provide your full name, email address, phone number, and company information (if applicable).

## Warranty

Targus warrants this product to be free from defects in materials and workmanship for one year. If your Targus accessory is found to be defective within that time, we will promptly repair or replace it. This warranty does not cover accidental damage, wear and tear, or consequential or incidental loss. Under no conditions is Targus liable for loss of, or damage to a computer; nor loss of, or damage to, programs, records, or data; nor any consequential or incidental damages, even if Targus has been informed of their possibility. This warranty does not affect your statutory rights.

## Regulatory Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

### FCC Statement

#### Tested to Comply

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Move the computer away from the receiver;
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
