

## Introduction

Congratulations on your purchase of the Targus Notebook Cooling Chill Mat. It is a cooling device for your notebook computer. The Chill Mat dissipates thermal heat, reducing your computer's overall temperature and providing maximum performance. Its thin yet durable design is both portable and sturdy.

## To use the Chill Mat

1. Place the Chill Mat on a work surface, such as a table, desktop or your lap.
2. Position your notebook computer on top of the Chill Mat.
3. Connect one end of the supplied USB cable into the Chill Mat's USB port and the other end into an available USB port on your notebook computer.
4. Move the Chill Mat's power switch to the "on" position. You are now ready to use your notebook computer with the Chill Mat.

\*The Targus Notebook Cooling Chill Mat works in a modular fashion by docking into the new Targus Desktop Notebook Stand with Passive Cooling - Model AWE13US (sold separately) to form a complete and fully adaptable solution for your mobile lifestyle.

**WARNING:** Keep all items, such as loose clothing, jewelry and long hair, away from the fans to avoid possible personal injury or damage to the Chill Mat or your computer.
